

## **ABOUT ARGETON**

---

An innovative façade solution with timeless elegance – that's Argeton.

Argeton is a terracotta ventilated rainscreen façade, perfect for use in conjunction with steel, glass or wood in new constructions, as well as lending renovation projects a modern character.

With Argeton, the durability is just as persuasive as the contemporary aesthetic: our ceramic façade panels are impervious to weather, impact-proof and shatterproof and require virtually no maintenance. Argeton is produced on request in every imaginable colour, shape and surface.

## PRODUCT RANGE

### TAMPA

The classic tile for a clean-cut building appearance: clear and simple in form.

### TERZO

False joints in the surface in various widths and distances create a lively façade design.

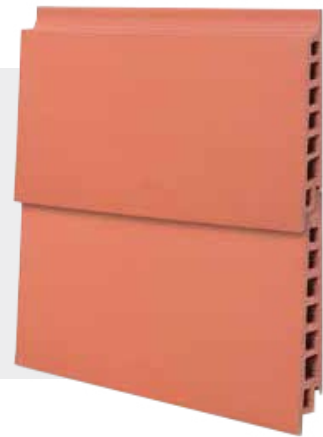

### LINEO

A stylish horizontal linear finish, created by 3 mm deep grooves.

## DANZA

The overlap of the individual panels creates a fascinating play of shadow, depending on how the light falls on the building façade.

## ALTIVO

Vertical oriented façade tiles. A new trend in terracotta façade design.

## INDIVIDUAL SHAPES

Custom-made tile shapes for unique architecture.

### BARRO – BAGUETTES AND LOUVRES

In addition to its function as an architectural design element the brick bar can also be used as sun, shade, or screen.

### ARGELITE

Stylish and uncomplicated – due to the low tile weight, ideal for renovation.

### CERAMIC CORNER

Straight and consistent corners for a perfect terracotta façade, down to the very last detail.

# COLOURS AND SURFACES

## STANDARD COLOURS

26 colours stand for a natural and subtle colour design.

Salmon/Pastel Red
